Need Case for: South Cayucos SC2

Best Server without South Cayucos SC2

Best Server with South Cayucos SC2

The plots above show the best server or sectors that cover this area. The pink area surrounding the proposed site is covered by the existing Cayucos site to the North West. This site has reached overload from the volume of data use in the area it serves. This project will improve service by moving the users in Southern Cayucos to a local cell that can better support their data needs as data use continues to grow while also improving in-building 4G coverage.
